

The Effective Team Leader

Leadership often begins at the team leader level across a wide range of enterprise and industry contexts. Team leaders communicate effectively, ensure team performance and develop effective relationships in the workplace. Across the breadth of industry, team leaders are responsible for implementing operational plans.

Four nationally recognised units of competency, known as a Skill Set, are included in this series of workshops scheduled one day a month for four months and cover the following:

- BSBLDR401 Communicate effectively as a workplace leader
- BSBLDR402 Lead effective workplace relationships
- BSBLDR403 Lead team effectiveness
- BSBMGT402 Implement operational plan

The training can be delivered on site at your business, at Jenard's Training rooms in Liverpool Street Hobart, or at a venue selected to be centrally located to the course participants in any region of Tasmania.
